

Retrieving Open-ended results from the EFTE in Canvas

- 1) Go to Quizzes area using the left-hand menu

The “Quizzes” link may be at a spot on the menu if you have your course set up in a different way than this example

- 2) Click the EFTE from the surveys list

Your other surveys and quizzes will appear on this list. I have renamed the EFTE to “EFTE – For Stephanie” for my course.

- 3) On the right side of the screen select “Survey Statistics.”

- 4) On the “Quiz Summary” page towards the top right, click the button called “Student Analysis.”

- 5) When you click this button, a .csv file will download to your computer that you can open in Excel (or other program that opens spreadsheets) and view all of the results, including the open ended ones.
